Hi Doug, I hope you can help me with identifying the wires on my Hayboer Peerless s-265 output transformer. Here's the 9 wire colors I have coming from one side (primary?): 1. white (UL 1 ?) 2. white with stripe (UL 2 ?) 3. blue (plate 1 ?) 4. blue with stripe (plate 2 ?) 5. black (40% 1 ?) 6. black with stripe (40% 2 ?) 7. gray (?) 8. red (CT and b+ ?) 9. pink (?) Is this a 10K PP transformer? And is the 10K from plate to plate? Here's the 6 wires from the other side (secondary?): 1. black 2. black with stripe 3. yellow 4. yellow with stripe 5. green 6. green with stripe I need a 4 ohm and an 8 ohm output. Thanks, Tom
