Yes, I noticed that they can provide replacement OPTs for various vintage amps. We know that they can provide custom things too, for example Doug`s versions (with multiple UL taps) of some vintage Peerless OPTs. Did you actually bought a pair (give us some details, \$, etc. if yes), and do you have a plan to build Eico/Mullard amp copy, and why? I mean, some new (and good, IMO) Doug`s PP designs are in "Projects" section...you can get a full suport here from the designer (and me + some others, of course, ) - but overall interest is low... I know, from talking to the actual building is abyss sometimes...but...
