Yes, I noticed that they can provide replacement OPTs for various vintage amps. We know that they can provide custom things too, for example Doug's versions (with multiple UL taps) of some vintage Peerless OPTs.Did you actually bought a pair (give us some details, \$, etc. if yes), and do you have a plan to build Eico/Mullard amp copy, and why?I mean, some new (and good, IMO) Doug's PP designs are in "Projects" section...you can get a full suport here from the designer (and me + some others, of course,) - but overall interest is low... I know, from talking to the actual building is abyss sometimes...but...
