Subject: Sourcing for plate Posted by Shane on Tue, 17 Oct 2006 21:47:34 GMT View Forum Message <> Reply to Message

Where is a good (read: inexpensive) place to purchase aluminum plate? I've heard that 0.09" is a good thickness for most amps. I'm going to have a go at building a Darling and was thinking aluminum top plate with wood chassis about 8" X 13" or so.
