On Line Metals is where I got the amp plate. 1/8" 6065 aluminum. Prices are good but the shipping always seems kinda high. Also, don't expect shiny smooth. Both this aluminum and a brass plate I used for the Cornet had scratches, some deep. I also found out that standard powder coating from my local source was very smooth and not that durable. Textured is better and that's what I'll get next time.

On Line Metals
