I'm completing the builder's directions for the ART arrays, and the final item I need is a crossover schematic I can attach to a word file. Can somebody out there do this and send it to me as an email attachment? Here's a verbal description of the crossover: Tweeter crossover: A 10uF cap followed by a 16 ohm shunt resistor across the tweeter. Woofer crossover: A 1.2mH inductor followed by a 4.7uF shunt cap, plus a zobel consisting of a 12 ohm resistor and 4.7uF cap in series with the resistor.
