Great looking MONGO amps Douglas. Thanks for sharing the fruits of all of your hard work. I bet they have enough balls to push any reasonable speaker load to ear splitting SPL's. No whimpy 2 watts here, capable of driving a speaker that will lay your hair back. While having plenty on reserve for pushing the heavy dynamics without whimpering out. Yeeha!! I would not doubt they sound great across the entire musical spectrum, loud or subtle. Congratulations! Norris
