Hi Damir I have just discovered this thread and forum. I have stumbled across the concept of driving a 300b with a pentode. 2 questions if I may. 1. Where would I get the 1700 H grid choke? What specs? 2. I have the iron for a parallel 300b set, can this driver stage be suitably modified to drive that or do I just use 2 of the 6688 driver stages? Thanks Nick
