Subject: Re: Correction! Posted by matrix on Fri, 29 Aug 2008 09:33:25 GMT View Forum Message <> Reply to Message

Dear Damir (and everybody else).....can anybody tell me if it will be possible for the E180F to drive 2 2A3 tubes in parallel....i know that the capacitance of the output tubes is a bit of a problem - maybe better to use E280F but still i want to know if it will be possible to drive PSE with 2A3's using E180F...... any opinions thanks in advance....
