One 10A Line Preamplifier, internal damage occurred during shipment to a customer so he couldn't try it. Outside is pristine, and shipper paid for repair. Some internal wiring, several parts, and tubes replaced (tubes not broken but replaced them anyway.) Looks great inside. Normal new price is \$1499.00. Asking \$899.00 includes shipping and handling. Full warranty and 45 day money back guarantee. If interested, please check out:
