At one time Dpa's \$10,000 flagship processor, and first generation of "Pulse Array" by Robert Watts (designer of Chord Dac64) and Dpa (Deltec) from Wales GB. Only 30 made, and considered at one time THE BEST in digital.(Own the review from Hi-Fi World '94) It includes 30lbs+ main processor, digital and analog power supply, and umbilical cords. Processor doesn't work, and it is a matter of tracing to the right chip in the digital part of the processor. Sold AS IS! \$1000 or best offer
