his is a 2 piece amp: power supply and amp connected by DIN umbilical cord. The amp reminds me of my Krell KMA-100's in that it is very quick, sound is neutral with no emphasize across spectrum with my Senn HD-600's. I'm selling it as I'm going 100% portable at this time.Pics in builder's original forsale ad here:
http://www4.head-fi.org/forums/show...&threadid=23438Remember - the inside has been cleaned up since those pics. Condition is same as in pics which is not cosmetically perfect but very,very acceptable. Breakdown of parts.Hand Matched Vishay Dale 1% metal film resistorsHand Mathced TransistorsTalema Toroidal TransformerNeutrik 1/4 locking jackAlps Black Beauty PotentiometerPanasonic Capacitors (for powersupply)Vishay Spargue Orange Drop Capacitors (for amp)OPA227Cardas GRFA female RCA connectorsPower supply is connected with a DIN connection to the amp.Hammond black andonized aluminum case. The parts are as good, if not better than the usual Headamp/antness-built Gilmore amp. notable upgrades include the use of the Alps Black instead of the Alps Blue, and CARDAS rcas, etcMy credentials (drguayo on ebay or audiogon)Amp is guaranteed and if any problems, I will refund in full minus shipping.$250 USD plus shipping from Canada postal code K1N 1G7thankscraig.
