I have two Bottlehead Paramours for sale. I built them two years ago, first without the CCS and then later added it. The kits are stock, no mods. They sound great. There is maybe 500-1000 hours playing time on them. I'm asking $400.00 for the pair.I also have a Bottlehead Foreplay for sale. It has been upgraded with the stepped attenuators and CCS. I didn't build this one, but it has been assembled properly and looks and sounds very nice. I'm asking $200.00 for this unit, or will combine with the Paramours for $500.00.
