I have a set of Quad 57 step up transformers for sale. These two units were taken from a set of perfectly working 57's. They have been completely rebuilt and fitted with five way binding posts. The cans have had thier seems rewelded (the spot welds pop open) and have been sand blasted and smoothed with bondo and powder coated. The transformers have been Cryo treated and reinstalled and fitted with factory wax in a vacuum chamber oven. If anyone here is interested please contact me at moray.james@3web.com regards Moray James
