I have a brand new pair of Bob's FTA-2000 speakers finished in African Mahogoney. These have upgraded BSC filter network parts installed (100.00 option). If you are not familiar with these, they use the Fostex F200A drivers (378.00/each) in a transmission loaded cabinet for bass response to 30 Hz, and that's not a stretch either.They only have about 200 hours on them. These are great speakers, but unfortunately are not quite enough for my 3500 cu. ft. room while playing Black Sabbath. Pics at link below.Email or 434-821-0172
