I bought these three months ago for $1100 shipped. I bought the optional Fostex grills with them which look great. I am trying to raise money to buy a 1960 Mercury Comet to restore so I'm selling bunch of gear. They are in African Mohogany. Local Atlanta only because they are very heavy. I will deliver in the Atlanta area for free or you can pick them up.If you go to the Brines website and go to the forums there is a picture of them posted a few threads down under Pete Whitley's speakers.These are awesome sounding speakers and I would like to keep them but I'm dying to get this old car.
