This is a great sounding little pre amp from Stan Warren. It is basically a hot rodded version of the Revelation II circui without phono stage. Can be used in active or passive mode. This unit is in perfect condition, no marks anywhere, and functions perfectly. Has a unique looking oak and acrylic chasis. HAve original box,manual,and schematic. Sound of this unit is very relaxed without losing any detail. Has a slightly warm prentation to the music that makes it very enjoyable to listen to. For the price you wont find a nicer pre amp. Originally sold for $500, selling price is $200. Have pics availalbe. E$mail me at misterpig@verizon.net. Trade under the Audiogon name of Neonknight.
