I have a pair of Coral bookshelf speakers that I bought new back in the mid 70's. They are in very good condition and I think they're XP55B's. They are 2 way bass reflex speakers with manual crossovers. They have 2 tweeters, a supertweeter, 2 mids, a woofer and subwoofer (I think). They also have reversible grill covers. The mids need re-coned, but other than that they're in very good condition.
