A nice pair of Pioneer coax units, ca 1970. I cleaned 'em up, and they work super. 16 ohm, 20W, 1st order crossovers inside. They are cast alumimum baskets, with a big bezel bolted on the front, designed for drop in mounting. Some cosmetic chips in the paint, but I repainted the grilles. Email me for pix. Asking $125 the pair, plus shipping (U.S. only) The cones and tweeters are in excellent shape. These have a nice Goodman or Tannoy kind of sound- If it wasn't for the fact I have too much speaker stuff, I'd keep them, probably in some kind of infinite baffle.I'll give this a week before they go to ebay.Larry Acklin
