Dear Gentlemen,I recently tested, and became a dealer of Jenalabs Esoteric 3D-X Sound Enhancer CD treatment. I tested it VS Auric Illuminator and the Esoteric was clearly superior. Below are links further explaining Esoteric 3D-X, and two reviews comparing the Esoteric to some top of the line CD enhancers. (I can send a small sample to anyone interested in testing Esoteric 3D-X themselves.)<http://www.sasaudiolabs.com/esoteric3d.htm> Compared to Walker Ultra Vivid, ClearBit/RealDisc, and Intron 8500

<http://db.audioasylum.com/cgi/m.mpl?forum=general&n=433308&highlight=jena&r=...> Normal price is \$79.95 plus S&H in continental USA (4 ounces, application pads, buffing cloths, and case). Special introductory price is \$75.00 plus S&H. If not satisfied, simply return the unused product during the first thirty days for a full refund. (Minus our original Mailing costs.) Take care.Steve
