Hi, I have a very nice pair of EV SP15's available for sale. These are the big chrome basket with huge Alnico magnet and motor. They were professionally reconed using EV kits and whizzers from existing drivers. They turned out very nice and sound wonderful. I had them reconed in hopes of putting them in my EV Regency cabinets and using them for my main set-up. The bottom line is that those lowboy cabs are just too big for the room so I'm going with smaller bass bin cabinets. I'm selling them along with the cabs to fund my new drivers and cabs. Listed as follows along with a few other EV speaker/drivers ect. I will provide all photos you request by email. MinnesotaEV
SP15 (pair reconed) \$ 500.00 oboEV SP15B (pair) \$ 135.00 oboEV Regency
Cabinets \$ 50.00 each (4 total, local only)EV 8HD horns w/1828R drivers \$ 120.00
oboThanksRon
