Wanted: Marantz SR6000DC coils. I am looking for the FM MPX adjustment filter coils/cans for my Marantz SR-6000-DC receiver. They are L301, L302 on MPX section of the tuner board. I would gladly accept the following: A complete SR6000DC receiver that I can use for parts for the FM circuits (preferred)The complete tuner board removed from a unit that you may be parting out (preferred)The two MPX coils themselves, carefully unsoldered, not damaged (L301 and L302)There may be other units out there that use these same parts. I can provide a picture of my unit where the coils are located. The original coils were removed and they were bypassed by the previous owner. Obviously, they were incorrectly adjusted, or the ferrite lugs became broken during adjustment and destroyed the internal coil.Please reply to me directly at [vinyltocdr@msn.com](mailto:vinyltocdr@msn.com) and title it Marantz Parts for the subject so it does not get deleted.Thanks very much for looking.Steve
