Oh my God! I hadn't heard that! My deepest condolences. I really liked Frank.I don't know what I can do to help, but please let me know. I am very familiar with the Stoetkit amps. I use the little Stoetkit Jr. as an entry level amplifier to show entry level speakers with. A guy can make a really great sounding system for under $2K with it.Jeez, I can't believe we're just now hearing about Frank's passing. It's quite a shock and I'm very sad to know he's gone.
