Several years ago I purchased from Bill H. at Great Plains a pair of coax (704-8A), and a pair of N1500-8A crossovers to use with them.A friend of mine was building the cabs (7.7 cu ft ported) for them to run in. Due to a lifestyle change geographically he moved before they were finished and I decided to take the cabinets as-is.After playing them for awhile I have decided they don't perform the way I desire would rather they go to a good home to someone who will appreciate them. Don't worry, I have plenty else to listen to....I'm asking:$1600.00 for the pair of 704-8A coax drivers.$300.00 for the pair of N1500-8A crossovers.I would rather not ship as these as they are high-tolerance drivers and shppers are not very kind.I would be willing to negotiate on the pair of cabs that are approx 85% completed and would only need some finishing work done to them.If interested and would be willing to discuss this over the phone, please send a e-mail through this forum with your phone nr to reach. I have "pre-paid" long distance in the 48 states, so my nickel.I might entertain barters for certain tube gear or other high-end drivers/horns.Regards, Ron
