This is a Delrin arm board made by Anthony Scillia, of Scillia/Merrill fame. Fits AR ES-1, or AR The Turntable, or anyothers with that shape arm board. It is cut for SME, but can be used with other arms like Regas, or others that mount via a single post tonearms, that attach by a nut on the other side. 50 plus shipping. Perfect condition. It also has the holes drilled to mount the SME base plate, I used to have an INfinity Black Widow on it, which used the SME mount. Russellc
