I am the original owner of a pair of Altec Lansing Santana IIs which are hooked up to my stereo system now and sound as good as they did 30+ years ago. These end table sized (25”Hx19”Wx16”D) speakers with a few minor blemishes have hand rubbed walnut cabinets (finished on 3 sides) and a composition black slate top and a black knit fabric removable front frame. Local pickup recommended (Princeton/Trenton, NJ) as each speaker weighs about 57 pounds. $575/pair
