Howdy Folks, In my search for a high sensitivity loudspeaker I stumbled across the Pi Web site. I am happy I did. The Speaker I selected (the Five Pi) is a stellar performer. For not a whole bunch of Peso's. But even more meaningful is the relationship I started with that "wacky" Wayne Parham. "Wacky" because when you catch him first thing in the morning before his coffee he's doing verbal flips. All kidding aside I've yet to meet a Man that has so much on the ball. No bull from this Guy, just a wealth of knowledge. He knows the sound that a speaker will create while it's still on paper. That's impressive. More later, I got Music on the Barbie'. Alan
