hi wayne, this is george from toronto. after many delays my cabinetmaker finally delivered my cabinets. wow are they huge, if my wife kicks me out of the house i'll just sleep in the cabinets! anyhow i have a small problem, the cut-out for the flare is larger than the eminence h290 flare. either my cabinet maker screwed up, or i have the wrong flare. rebuilding the cabinet is too much work. if in fact the cut-out was done for the jbl flare can i use it with my psd2002 driver? please help me out, i been tuneless for 3 weeks since i sold my previous speakers. thanks george.
