Subject: wrong adapters Posted by jazzbo on Wed, 25 Apr 2001 21:18:11 GMT View Forum Message <> Reply to Message

Hi Wayne-I'm in the process of ordering parts for four pi's. I am going to use the JBL 2226 and Eminence PSD2002. I ordered the 2002s' from antique (closeout-no return) and found some flange to screw adapters from MCM. Unfortunately, the adapters have male threads, which are also on the drivers. Eminence does not carry adapters, and neither does Antique. Any suggestions? Tnanks
