Hi Folks, Wayne, The web page I did for Wayne is a gift for all the time heputs into this group and helping other out. I've been mentionedin one other thread about attenuation also.I'm working on a pair of Four-Pi's using Eminence Kappa 15's,Altec 811 horns/806A drivers, and EV TW-35 tweeters. I'llpost pictures once I get both built and have a cabinet forthe horns. There's now way both of those would fit in thebox. I'm going to build a seperate box that goes on top.Chris
