Subject: delta 15's in folded horns? Posted by rewfew on Wed, 15 Aug 2001 22:52:37 GMT View Forum Message <> Reply to Message

Hey fellers: Can you use the delta 15's in a folded horn design? I really want to make the corner 7 pi's, but my house has only one real good corner. I've already purchased the drivers and want a horn design for tube equipment. I know I could do the bass reflex 4 pi but I'm just a horny kind of guy.
