Hi Wayne-Several months back you were nice enough to send me plans for the pro series pi 4's. I just signed up for a woodworking class at a local junior college, and have decided to take on the more ambitious project - the pro pi 7's (I have the suitable room corners). Would it be possible to now receive these plans?Thans again for all of your helpful posts. I feel like monitoring your site like receiving a free college degree in speaker design!
