i was at a concert recently and listened to a system that had some EAW sub cabinets similar looking to yours. I have a 6000 sq foot shop for my vending buisness that i would like to put some bass in it. I have 2- earthquake ls-18 subs. will your box design combined with those subs work? and if so what size sould i make them. "i have tons of room and a peavy 800 i got in a trade"
