Hi,I have ordered a pair of Laurels 300BIIIX monoblocks,and i d like to know which Pi speakers would work best with the amp.My room is about 12'x12' and is pretty small.I currently have a 88db speaker which i m afraid wont suite the amp.Have you guys aything good to recommened?Or maybe other speakers?I dont mind if its a kit or assembled,as long as they sound beautiful.Listen mostly to Jazz and RockThanks guysRegards,Choy.
