---

I e-mailed a friend a few days ago and told him that he should buy a couple of 2245's at JBL's tent sale for whatever speaker project he thinks of next. He said he tried to buy some but that they aren't available anymore. Has anyone successfully ordered any 2245's within the last couple days or so? The site says there are still some left, so I'm wondering if it was just a glitch or something. Thanks, Mike Borzcik
