Subject: Imaging & Pi's Posted by Fiddler on Sat, 27 Oct 2001 01:13:14 GMT View Forum Message <> Reply to Message

All of the horns I have ever heard suffered from less than stellar imaging. I currently have Newform 645's and the imaging has to be heard to be believed. One literally cannot locate the speakers with your ears.I would like to build some high efficiency speakers at some point to try SET's. But I don't want to sacrifice imaging.How is imaging with the Pi's?Thanks
