i'm in trouble now! just ordered 4 pairs of these speakers from the tent sale.<http://www.jblpro.com/pages/install/4655bk.htm>. i figured the drivers are worth triple the cost of the complete speakers. c'mon \$222.00 a pair delivered. wayne, any info on an improved cabinet for these babies? or are these good enough left alone. can i build some killer's with these components? thanks,george
