Subject: Re: MD2001 - Good down to 1Khz; PSD2002 - Slightly higher Posted by Adam on Sat, 15 Dec 2001 18:56:32 GMT View Forum Message <> Reply to Message

I find it weird that Eminence only advertises the frequency response of the 2002 as down to 1.5 kHz, yet the power rating is at 1 kHz. I am in agreeance with Wayne, I think you could run it down to 1.2 without a problem, you'll lose some power handling, though.... If you can keep the volume down a bit it should be fine.
