hi freddy, i've been listening to my 4 pi's for a couple of months now. bass is tight, dynamic and effortless. even at concert levels there is no excursion at all. i believe they can handle 1000 watts (my windows cannot) and have been pleased with the performance. i only went with them because of the deal i got and as you said they do look cool. i'll post a review once my active x-over is installed.cheers,george
