I haven't heard anything to the contrary so I'm expecting a JBL 4648 with 2- 2226 8 ohm woofs. $221 delivered instead of $325 each plus freight. YEEEHAW!I'm thinking corner 7's with Eminence tweeter and 3 channels of 200 watts for the old home theatre. Or maybe I keep the satellites for the fronts and build a great big center channel/subwoofer/TV stand.I can't even figure out crossover schematics and I'm scoring drivers in the street. Just shoot me, somebody.
