I should have seen that the 8 would be 8 ohms with the 2 drivers combined. But if I don't wind up using them in place of the Delta's I will use them together, with another PSD-2002 horn for a kick-ass center channel for my HT setup.BTW, have you figured out how the "net weight" can be 137 lbs and the "shipping weight" is 104 lbs.? Is this a trick question?I also wonder if the $220 covers all the truck freight from Northridge to Ohio!
