Adam, Good for you and more power to you for having the courage to post the photo. Seriously, I'm about ready to throw something together real quick as well; I've got the drivers, crossover components and a working stereo but no materials to make the cabinets. I have a load of apprehension concerning my wife's reaction when she sees the 9 cubic feet each of Theater 4 Pi's sitting in our living room in a few weeks. Happy Holidays to you! Garland
