The 3677S uses a 2035 woofer and 2416 tweeter, which are lower cost substitutions for the 2226 and 2426. They'll generally work with the same cabinet and crossover but cost less. People that have purchased them are pleased, although the general concensus is the 2226 is a better part, worth the extra money. The 2416 is virtually identical to the 2426 with only minor differences. The 3677S is a budget speaker but, especially at tent sale prices, is well worth the money.
