There's 2 of these suckers. 2 bases, two plates to paint, double all the parts with those itzy little screws and washers. I'm on page 27. Just finished connecting the 2 green wires; one to B4 and 5, the other to B9. Sound familiar? And except for the ground plane, all the wire is stranded, all those little bits wanting to head off in some other direction than what you intended. Jeepers! It's looking like Wednesday to finish. Maybe I'll stretch out the fun for the 12 days of X-mas.
