I've gone and ordered those big honkin' 4648A-8 cabinets! Two of them!And I already have a pair of half completed Pi 7 cabs for the 2226H motors! Oh well, time for a redesign. Couldn't pass up such a great deal. I think this time around I'll be building 4 Pi's rather than 7 Pi's. Will run the 2226J's in parallel. Should be an ultra low distortion setup. Now if I can find a deal on some horns.....
