Most pro drivers aren't a good choice for that really deep bass. Your best bet for hitting those super deep notes are higher Q, lower fs woofers in large ported boxes, something like the tempest or shiva available from [www.adireaudio.com](http://www.adireaudio.com) 5 cubes, 2 4" diamter ports 12" long tuning 30 Hz for the tempest will give you amazing all around bass. Adam
