Subject: Electrolytic capacitors Posted by Wayne Parham on Thu, 17 Jan 2002 05:23:25 GMT View Forum Message <> Reply to Message

If you need a large capacitance value, I would suggest paralleling large polypropylene caps instead of electrolytics. But you can use electrolytic capacitors provided they are non-polarized and their rated breakdown voltage isn't exceeded. Electrolytics tend to go bad with age, so keep that in mind too.
