Thanks Wayne!!Back at my old home in Canada I have 2 pairs of Klipsch Chorus which were bought when I was a kid way back in 1987/88. I've noticed that the highs and mid. freq. have really faded so will look at the xover later this year (aging electrolytics).Looking to place an order online for the remainding parts in the Theater 4 Pi. I made the mistake of ordering the PSD2002-8 "Bolt-on" and the Peavey CH-3 horn flare (which is a screw on flare). So will look to buy the Eminence H290 flare online which works out to be cheaper than buying the Peavey CH-3 horn here. By the way, what is a fair price (US$) for a pair of CH-3 flares? I'm wondering if buying the CH-3 here for future project (7 pi?).
