Well worth the wait! Now I'm really stoked to get the Pi's and Paramours up and running. The way you describe the sound is close to what I'm looking for....And Trance, I think you will enjoy the Bottlehead and Pi experience; - makes audio a real dynamic,exciting and affordable hobby. Where else in audio can a \$20 cap or resistor swap produce as great a change in the sound of your system as can be done DIY as opposed to selling one component for half what you paid for it and getting another for too much \$\$\$\$. And Top Flight sound, to boot! And then there is the generous spirits of Dan (Doc) Schmalte and Wayne Parham who let the good times roll!Garland
