i have 2 cerwin vega 12's, 400 watt rated. for the moment all i have for an amp is a 1 channel 300 watt jbl that was loaned to me from a friend. Is their a way i can wire this to get the most out of the system? Some have told me to make a parallel circuit. E-mail me at chad03987@hotmail.com , any advice is appreciated, thanks - chad
